AbdElgwad Mohamed Habib

Penetration Tester

Email: abdelgwadhabib5122004@gmail.com | **Phone:** +20 102 155 1718
LinkedIn: linkedin.com/in/abdelgwad-habib | **GitHub:** Abdelgwad-Habib

Profile

Passionate CS student focused on cybersecurity and penetration testing. Skilled in C++, Python, HTML, and Linux with hands-on CTF and scripting experience. Solid understanding of web vulnerabilities and the OWASP Top 10. Seeking a junior role to apply and grow my skills. Completed 7+ courses, 100+ hours coding problems, CTFs, and built Bash & C++ tools used in lab environments.

Professional Experience

Summer Intern – Network Infrastructure **Jul 2025 – Aug 2025**
NTI (National Telecommunication Institute) Cairo, Egypt

- Completed 120-hour training covering network fundamentals, routing, and switching.
- Applied VLANs, static routing, and subnetting in a hands-on project simulating real infrastructure.
- Achieved 97% final evaluation score.

Junior Penetration Tester & Security Enthusiast **Jan 2024 – Present**
Self-Learning

- Studying cybersecurity and ethical hacking through platforms like TryHackMe and CyberShield; built the Phoenix DNS tool, solved 10+ labs and CTFs, and practiced with tools like Nmap, Wireshark, and Burp Suite while advancing in scripting, Linux hardening, and automation.

Problem Solver & Junior Developer (C++ & OOP) **2023 – Present**
Self-Learning

- Solved 120+ problems on platforms like Codeforces and Vjudge, maintaining a 30-day streak.
- Created simple applications using object-oriented programming and key data structures.
- Applied practical problem-solving as an ICPC competition programmer.

Education

Bachelor of Computer Science **Sep 2023 - Jun 2027**
Tanta University Tanta, Egypt

Projects

Small Network Infrastructure Project
VLAN | Static Routing | Subnetting NTI Training

- Designed and implemented a small-scale network applying VLANs, static routing, and subnetting concepts.
- Tested connectivity and optimized IP allocation for efficient traffic management.

Pharmacy Management System
C++ | Object-Oriented Programming | File Handling

- Built a console-based pharmacy system using OOP with modules for inventory, billing, reporting, and persistent file storage focusing on usability and data validation.

Phoenix – DNS Enumeration Tool
Bash Scripting | Linux CLI Tools

- Developed a Bash tool for DNS enumeration (Forward/Reverse Lookup, Zone Transfer) used in lab assessments; enhanced Linux networking and scripting skills.

Mini OOP & Data Structures Applications
C++ | Educational Projects

- Built OOP-based apps applying custom classes and core data structures (stacks, queues, etc.).

Skills

Programming Languages:
C++, Java, Python, Bash, HTML
Tools & Technologies:
Kali Linux, GitHub, Visual Studio Code, Nmap, Wireshark, Burp Suite
Cybersecurity Concepts:
OWASP Top 10, Web Penetration Testing, DNS Enumeration, Linux Hardening

Problem Solving & Algorithms
CTF (Solving 20+)
Soft Skills: (Communication, Teamwork, Self-learning, Time management, Adaptability)

Certificates

- Web Penetration Testing – International Professionalism Academy (IPA) Aug 2025
  Awarded with Distinction | (160 Hrs)
- Network Infrastructure – NTI Summer Training Jul 2025 – Aug 2025
  Score: 97% | (120 Hrs)
- Pre Security – TryHackMe (40 Hrs)
- Introduction to Cyber Security – TryHackMe (24 Hrs)
- Python for Security (Self-Study) (25 Hrs)
- Security+ (Self-Study) (21 Hrs)
- Linux+ (Self-Study) (20 Hrs)
- Network+ (Self-Study) (40 Hrs)
- Fundamentals of Linux – Udemy (15 Hrs)

Languages

Arabic (Native), English (B2 – Assessed by AUC Placement Test)
